Profile

"Mens agitat molem" - the mind moves the matter.
In my studies of Interaction Design I got a glimpse at the power a mind holds over matter.
I strive to obtain insights at how products and concepts may enrich our lives through playful and pleasant experiences.
I am curious. I like to tinker. I am quick to learn. I am a casual perfectionist with love for the detail. I like to challenge things as they are, especially myself. Most of all, I am a bonvivant of calm walks through crisp and golden late-autumn woods.

Languages

- DE german (native)
